CONSULATE GENERAL OF THE PEOPLE'S REPUBLIC OF CHINA IN BRISBANE

Congratulatory Message

On behalf of the Consulate General of the People's Republic of China in Brisbane, I extend my warm congratulations on the opening of 2019 China-Australia Science, Technology, Commercialization and Innovation Forum.

Recent years have seen increasing pragmatic cooperation between China and Queensland, Australia in many sectors. In particular, significant progress has been made in scientific and technological cooperation, including joint research and development, talent training, industry-academia-research integration and synergy, and the application of advances in science and technology. Chinese universities, research institutes and enterprises and their Queensland partners have established over 10 joint laboratories and research centres. The Torch High Technology Industry Development Centre under the Chinese Ministry of Science and Technology has signed a memorandum of understanding with the Queensland Department of Health and the Department of Environment and Science on Queensland Torch Health and Medicine Precinct. The collaboration in science, technology and innovation has become a new highlight of bilateral pragmatic cooperation, providing new impetus to develop the bilateral relationship.

This forum is another grand gathering of the Chinese and Australian research communities since the 2016 inaugural forum. It is of great significance in promoting China-Australia and China-Queensland cooperation on science, technology and trade, enhancing industry-academia-research synergy, and expediting research translation.

I hope that the delegates take full advantage of the forum to exchange ideas, explore new mechanism and new models for China-Australia and China-Queensland cooperation in science, technology, innovation and commercialization, and make research and innovation better benefit the people of our two countries and the world.

As the Chinese lunar new year is coming, I would like to take this opportunity to wish all participants and your families a healthy, happy and prosperous Year of the Pig!

I wish the Forum a great success!

Dr XU Jie, Consul-General

A MESSAGE FROM THE QUEENSLAND GOVERNMENT'S REPRESENTATIVE OFFICE IN CHINA

Queensland has embarked on a journey to become one of the key innovation hubs in the Asia-Pacific region. Through our Advance Queensland initiative, the Queensland Government is focused on creating a strong and resilient knowledge-based economy, with science, innovation, creativity and entrepreneurialism at its core.

We know that the best way to achieve our goal is through collaboration between business and researchers across borders.

Collaboration is key when it comes to advancing innovation in science, technology and industry.

And China is one of our most valued partners.

Queensland has strong ties with China, with our scientific collaborations driving advances in agriculture and food, health and medical research, clean and renewable energy technology, and in advanced materials such as nano-technology and digital-enabled technologies.

The Second China-Australia Science, Technology, Commercialisation and Innovation Forum offers an opportunity to see how we can further consolidate our relationship, particularly around how best to translate our great ideas and breakthroughs into vaccines, medical devices, products and services, and accelerate their commercial availability for the benefit of both nations.

Forums such as this are critical for building important strategic research and commercialisation collaborations.

I commend the Forum organising committee for producing a comprehensive program with conference themes focused on our established research strengths and strategic collaborations in the areas of: energy and resources, advanced materials and manufacturing, environment and ecology, and biomedicine and health.

I'm confident that this second Australia-China Forum will help pave the way for innovative new collaboration and commercialisation opportunities between our two nations.

My best wishes for a very productive and enjoyable forum!
